Profile Summary

Data Science undergraduate passionate about transforming data into actionable business insights. Experienced in data analytics, market research, and AI-driven projects, with proficiency in SQL, Python, and database management.

Work Experience

Areion, Mumbai **Aug'25 – Oct'25**

Business Analyst Intern — Market Research, Client Growth Analysis & Sales Support

- Conducted market research and competitive analysis to identify prospective clients, directly informing business development and growth strategy.
- Sourced and qualified new business leads, bringing in **5+ new clients** and strengthening the sales pipeline.
- Synthesized client insights into clear, actionable reports for the sales team, improving outreach prioritization and decision-making.

Qoneqt, Mumbai **Oct'25 – Present**

Technical Intern — App Testing, QA & Feature Validation

- Analyzed product performance and usability through structured functional testing, translating technical findings into business-relevant insights for stakeholders.
- Coordinated cross-functionally between QA and product teams to track issues and validate new feature releases, ensuring execution stayed aligned with business requirements.
- Delivered **10+ structured feedback reports** on features and issues, strengthening communication between technical and non-technical teams.

Projects

JurisAI – AI-Powered Indian Legal Assistant

Next.js — Python — AI API — SQL

- Developed a legal chatbot to help users find relevant Indian law sections and understand legal concepts through an AI-powered interface.
- Built the backend using Python Flask and integrated AI APIs to generate data-driven, context-aware responses.
- Added court location search and legal reference features, improving usability and information accessibility.

Market Pulse

Python — Pandas — FinBERT — Streamlit — Plotly — yfinance

- Built an end-to-end pipeline collecting stock prices for 17 NSE-listed companies and news headlines, scoring each with FinBERT and measuring sentiment vs. daily returns using Pearson and Spearman correlation.
- Designed an interactive Streamlit dashboard visualizing price trends, sentiment-vs-return scatter plots, and return distributions to support data-driven decision-making.

Technical Skills

- **Languages & Tools:** Python, MYSQL,Azure Fundamentals, Git & GitHub, DBMS
- **Concepts:** Data Structures & Algorithms, Data Analysis, Database Querying, Cloud Computing
- **Business Skills:** Market Research, Stakeholder Communication, Client Growth Analysis

Activities

- **Scholarship:** Recipient of a merit-based scholarship from the Smile Foundation.
- **Leadership:** Junior Student Council Member, strengthening team management and communication skills.
- **Certification:** The Complete Python Bootcamp: From Zero to Hero in Python (Udemy).
- **Volunteering:** Volunteered at the International Climate Change Conference, collaborating with peers from India and CUNY University.
